Education

Saint Xavier University

Chicago, IL

Bachelors in Computer Science | Expected May 2025

August 2021- Present

Related Courses: Related Courses - Games 201: Learn about game making, evaluate the pros and cons of various games, and apply these insights to our own game development process. Principles of Computer Programs I-202: I learned the basic codes and structures of java and wrote a tic-tac-toe game code. Principles of Computer Programs II-203: I learned about various sorting, learned recursion in one course, and used recursion to create graphics. Virtual Worlds -200: Through learning, you can make some simple animations or controllable animation games. Data Structures and Algorithms -311: Learn something about linked lists and have a preliminary understanding of cryptocurrencies (such as Bitcoin) in this course. In this semester, I also learned to code on web pages through HTML and CSS through Web Applications I-206. At the same time, I learned SQL in Relational/Dbase/Theo/Design -321.

Experience
